SUMMARY

Machine Learning Engineer with 3+ years of experience designing intelligent AI systems using **Python, Machine Learning, NLP, Deep Learning, and Large Language Models**. Experienced in developing end-to-end ML pipelines, semantic search applications, retrieval-augmented generation (RAG) systems, and deploying scalable AI applications using **Scikit-learn, TensorFlow, LangChain, Hugging Face Transformers, Docker, AWS, and Streamlit**. Passionate about solving business problems through data-driven AI solutions.

EDUCATION

Indian Institute of Information Technology, Hyderabad

Bachelor of Technology in Computer Science | CGPA: 9.1/10

Coursera

Machine Learning Specialization

Hyderabad, India

2019 – 2023

Online

2023

EXPERIENCE

Machine Learning Engineer

NeuralVision AI Solutions

Bengaluru, India

July 2023 – Present

- Designed and deployed end-to-end machine learning pipelines for customer analytics, document intelligence, and predictive modeling using Python and Scikit-learn.
- Built NLP-powered applications using Sentence Transformers, Hugging Face, and LangChain to automate document search and semantic similarity tasks.
- Developed Retrieval-Augmented Generation (RAG) applications integrating vector databases and Large Language Models for enterprise knowledge retrieval.
- Collaborated with cross-functional teams using Git and GitHub while following clean coding practices and modular software design.
- Containerized AI applications using Docker and deployed cloud-ready services on AWS.

TECHNICAL SKILLS

Languages: Python, SQL, Java

Machine Learning: Scikit-learn, TensorFlow, PyTorch, XGBoost, Deep Learning, Model Deployment

Natural Language Processing: NLP, Transformers, BERT, Sentence Transformers, Prompt Engineering, LangChain

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, Data Visualization

Cloud: AWS, Docker

Databases: PostgreSQL, MySQL

Developer Tools: Git, GitHub, VS Code, Streamlit

PROJECTS

AI Resume Screening System | *Python, Sentence Transformers, LangChain, Streamlit, FAISS*

- Built an intelligent recruitment assistant capable of ranking resumes against job descriptions using semantic similarity.
- Implemented document parsing, embedding generation, cosine similarity scoring, and AI-generated candidate evaluation.
- Integrated LangChain with Large Language Models to generate human-readable recruitment insights and hiring recommendations.

Research Paper Assistant (RAG System) | *Python, LangChain, Hugging Face, ChromaDB*

- Developed a Retrieval-Augmented Generation application capable of answering research questions from uploaded PDF documents.
- Implemented document chunking, vector embeddings, semantic search, and citation-aware responses using open-source LLMs.
- Built an interactive Streamlit interface for document upload, querying, and response visualization.

Customer Churn Prediction Platform | *Python, Scikit-learn, Pandas, SHAP, Streamlit*

- Developed an end-to-end machine learning application predicting telecom customer churn using demographic and service usage data.
- Performed feature engineering, model comparison, hyperparameter tuning, and explainability using SHAP values.
- Deployed an interactive dashboard providing prediction confidence, business insights, and customer retention recommendations.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- TensorFlow Developer Certificate
- DeepLearning.AI Machine Learning Specialization
- Generative AI with Large Language Models
