SUMMARY

Data Scientist with 2+ years of experience developing predictive machine learning models and data-driven business solutions using **Python, Machine Learning, Statistics, SQL, and Data Visualization**. Experienced in feature engineering, model evaluation, customer analytics, and NLP applications using **Scikit-learn, Pandas, NumPy, TensorFlow, and Streamlit**. Passionate about transforming data into actionable insights.

EDUCATION

National Institute of Technology Karnataka

Bachelor of Technology in Computer Science | CGPA: 8.8/10

Google Data Analytics Professional Certificate

Professional Certification

Surathkal, India

2019 – 2023

Online

2023

EXPERIENCE

Data Scientist

Insight Analytics Pvt. Ltd.

Hyderabad, India

July 2023 – Present

- Developed predictive machine learning models for customer segmentation and sales forecasting.
- Performed exploratory data analysis, feature engineering, and model evaluation using Scikit-learn and Pandas.
- Created interactive Streamlit dashboards for business intelligence and model monitoring.
- Collaborated with business stakeholders to deliver data-driven insights improving operational efficiency.

TECHNICAL SKILLS

Languages: Python, SQL

Machine Learning: Scikit-learn, TensorFlow, Classification, Regression, Clustering

Natural Language Processing: TF-IDF, Text Classification, Tokenization

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Statistics, EDA

Databases: MySQL, PostgreSQL

Developer Tools: Git, GitHub, Jupyter Notebook, VS Code, Streamlit

PROJECTS

Customer Churn Prediction System | *Python, Scikit-learn, Pandas, SHAP*

- Developed a machine learning system to predict telecom customer churn using classification algorithms.
- Performed feature engineering, hyperparameter tuning, and explainable AI using SHAP.

Sales Forecasting Platform | *Python, XGBoost, Streamlit*

- Built a demand forecasting application for retail sales prediction using time-series data.
- Developed an interactive dashboard for business users using Streamlit.

News Classification System | *Python, NLP, TF-IDF, Scikit-learn*

- Developed an NLP pipeline to classify news articles into predefined categories.
- Implemented text preprocessing, TF-IDF vectorization, and Linear SVM classification.

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- IBM Data Science Professional Certificate
- Machine Learning Specialization - Coursera
- Python for Data Science - IBM
